Financial Statements for the
Six Months Ended June 30, 2010 and 2009 and
Independent Auditors' Report

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
TXC Corporation

We have audited the accompanying balance sheets of TXC Corporation (the "Corporation") as of June 30, 2010 and 2009, and the related statements of income, changes in stockholders' equity, and cash flows for the six months then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of TXC Corporation as of June 30, 2010 and 2009, and the results of its operations and its cash flows for the six months then ended, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, requirements of the Business Accounting Law and Guidelines Governing Business Accounting relevant to financial accounting standards, and accounting principles generally accepted in the Republic of China.

We have also audited the accompanying schedules of significant accounts, provided for supplementary analysis, by applying the same procedures described above. In our opinion, such schedules are consistent, in all material respects, with the financial statements referred to above.

As stated in Note 3 to the financial statements, on January 1, 2009, the Corporation adopted the newly revised SFAS No. 10 "Accounting for Inventories"

We have also reviewed the consolidated financial statements of TXC Corporation and subsidiaries as of June 30, 2010 and 2009, and expressed unqualified opinion and modified unqualified opinions with explanatory paragraphs on such financial statements.

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

1. ORGANIZATION AND OPERATIONS

TXC Corporation (the Corporation) was incorporated on December 28, 1983 under the Company Law and related regulations of the Republic of China (ROC).

The Corporation specializes in five categories of products such as high quality Quartz Unite Crystul, Automotive Crystal, Crystal Oscillator (CXO) Surface Acoutic Wave (SAW) Filter, and Timing Module (TM), and provides for a complete solution of frequency devices and modules, design in service to fully satisfy various needs of the customers.

On August 26, 2002, the Corporation's shares began to be traded on the Taiwan Stock Exchange.

As of June 30, 2010 and 2009, the Corporation had 1,017 and 943 employees, respectively.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, Business Accounting Law, Guidelines Governing Business Accounting, and accounting principles generally accepted in the ROC. Under these guidelines, law and principles, certain estimates and assumptions have been used for the allowance for doubtful accounts, allowance for loss on inventories, depreciation of property, plant and equipment, income tax pension cost, bonuses to employees, directors and supervisors, and impairment of assets, etc. Actual results may differ from these estimates.

For readers' convenience, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the ROC. If inconsistencies arise between the English version and the Chinese version or if difference arises in the interpretations between the two versions, the Chinese version of the financial statements shall prevail.

Significant accounting policies are summarized as follows:

Current/Noncurrent Assets and Liabilities

Current assets include cash and cash equivalents, and those assets held primarily for trading purposes or to be realized, sold or consumed within one year from the balance sheet date. All other assets such as property, plant and equipment and intangible assets are classified as noncurrent. Current liabilities are obligations incurred for trading purposes or to be settled within one year from the balance sheet date. All other liabilities are classified as noncurrent.

Cash Equivalents

Cash equivalents, consisting of commercial papers, bank acceptances and repurchase agreements collateralized by bonds, are highly liquid financial instruments with maturities of three months or less when acquired and with carrying amounts that approximate their fair values.

Financial Assets and Liabilities at Fair Value through Profit or Loss

Financial instruments classified as financial assets or financial liabilities at fair value through profit or loss (FVTPL) include financial assets or financial liabilities held for trading and those designated as at FVTPL on initial recognition. The Corporation recognizes a financial asset or a financial liability on its balance sheet when the Corporation becomes a party to the contractual provisions of the financial instrument. A financial asset is derecognized when the Corporation has lost control of its contractual rights over the financial asset. A financial liability is derecognized when the obligation specified in the relevant contract is discharged, cancelled or expired.

Financial instruments at FVTPL are initially measured at fair value. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss. At each balance sheet date subsequent to initial recognition, financial assets or financial liabilities at FVTPL are remeasured at fair value, with changes in fair value recognized directly in profit or loss in the period in which they arise. On derecognition of a financial asset or a financial liability, the difference between its carrying amount and the sum of the consideration received and receivable or consideration paid and payable is recognized in profit or loss. All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

A derivative objective of the Corporation is to minimize risks due to changes in fair value or cash flows, that does not meet the criteria for hedge accounting is classified as a financial asset or a financial liability held for trading. If the fair value of the derivative is positive, the derivative is recognized as a financial asset; otherwise, the derivative is recognized as a financial liability.

Fair values of financial assets and financial liabilities at the balance sheet date are determined as follows: Financial assets and financial liabilities without quoted prices in an active market - at values determined using valuation techniques.

Available-for-sale Financial Assets

Available-for-sale financial assets are initially measured at fair value plus transaction costs that are directly attributable to the acquisition. At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are remeasured at fair value, with changes in fair value recognized in equity until the financial assets are disposed of, at which time, the cumulative gain or loss previously recognized in equity is included in profit or loss for the period. All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

The recognition, derecognition and the fair value bases of available-for-sale financial assets are the same with those of financial assets at FVTPL.

An impairment loss is recognized when there is objective evidence that the financial asset is impaired. Any subsequent decrease in impairment loss for an equity instrument classified as available-for-sale is recognized directly in equity. If the fair value of a debt instrument classified as available-for-sale subsequently increases as a result of an event which occurred after the impairment loss was recognized, the decrease in impairment loss is reversed to profit.

Fair value of financial assets at the balance sheet date is determined as follows: Open-end mutual funds - at net assets values.

Revenue Recognition, Trade Receivables and Allowance for Doubtful Accounts

Revenue from sales of goods is recognized when the Corporation has transferred to the buyer the significant risks and rewards of ownership of the goods, primarily upon shipment, because the earnings process has been completed and the economic benefits associated with the transaction have been realized or realizable. The Corporation does not recognize sales revenue on materials delivered to subcontractors because this delivery does not involve a transfer of risks and rewards of materials ownership.

Revenue is measured at the fair value of the consideration received or receivable and represents amounts agreed between the Corporation and the customers for goods sold in the normal course of business, net of sales discounts and volume rebates. For trade receivables due within one year from the balance sheet date, as the nominal value of the consideration to be received approximates its fair value and transactions are frequent, fair value of the consideration is not determined by discounting all future receipts using an imputed rate of interest.

An allowance for doubtful accounts is provided on the basis of a review of the collectibility of accounts receivable. The Corporation assesses the probability of collections of accounts receivable by examining the aging analysis of the outstanding receivables.

Inventories

Inventories consist of raw materials, supplies and spare parts, work-in-process, finished goods and merchandize. Before January 1, 2009, inventories were stated at the lower of cost or market value. Any write-down was made on a total-inventory basis. Market value meant replacement cost for raw materials and supplies and spare parts and net realizable value for work in process, finished goods and merchandize. As discussed in Note 3, effective January 1, 2009, inventories are stated at the lower of cost or net realizable value. Inventory write-downs are made item by item, except where it may be appropriate to group similar or related items. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at weighted-average cost on the balance sheet date.

Financial Assets Carried at Cost

Investments in equity instruments with no quoted prices in an active market and with fair values that cannot be reliably measured, such as non-publicly traded stocks and stocks traded in the Emerging Stock Market, are measured at their original cost.

Cash dividends are recognized on the ex-dividend date, except for dividends distributed from the pre-acquisition profit, which are treated as a reduction of investment cost. Stock dividends are not recognized as investment income but are recorded as an increase in the number of shares. The total number of shares subsequent to the increase is used for recalculation of cost per share. The difference between the initial cost of a debt instrument and its maturity amount is amortized using the effective interest method, with the amortized interest recognized in profit or loss.

An impairment loss is recognized when there is objective evidence that the asset is impaired. A reversal of this impairment loss is disallowed.

Investments Accounted for by the Equity Method

Investments in which the Corporation holds 20 percent or more of the investees' voting shares or exercises significant influence over the investees' operating and financial policy decisions are accounted for by the equity method.

Profits from downstream transactions with an equity-method investee are eliminated in proportion to the Corporation's percentage of ownership in the investee; however, if the Corporation has control over the investee, all the profits are eliminated. Profits from upstream transactions with an equity-method investee are eliminated in proportion to the Corporation's percentage of ownership in the investee.

Property, Plant and Equipment, Assets Leased to Others and Idle Assets

Property, plant and equipment and assets leased to others are stated at cost plus revaluation increment less accumulated depreciation. Borrowing costs directly attributable to the acquisition or construction of property, plant and equipment are capitalized as part of the cost of those assets. Major additions and improvements to property, plant and equipment are capitalized, while costs of repairs and maintenance are expensed currently.

Depreciation is provided on a straight-line basis over the estimated useful lives as follow: buildings - 4 to 51 years; machinery and equipment - 4 to 9 years; transportation equipment - 3 to 6 years; miscellaneous equipment - 3 to 9 years; Assets leased to others – 4 to 61 years.

Property, plant and equipment and assets leased to others still in use beyond their original estimated useful lives are further depreciated over their newly estimated useful lives. Depreciation of revaluated assets is provided on a straight-line basis over their remaining estimated useful lives determined at the time of revaluation.

The related cost (including revaluation increment), accumulated depreciation, accumulated impairment losses and any unrealized revaluation increment of an item of property, plant and equipment are derecognized from the balance sheet upon its disposal. Any gain or loss on disposal of the asset is included in nonoperating gains or losses in the period of disposal.

Impairment of Assets

If the recoverable amount of an asset (mainly property, plant and equipment, idle assets, leased assets and investments accounted for by the equity method) is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is charged to earnings unless the asset is carried at a revalued amount, in which case the impairment loss is first treated as a deduction to the unrealized revaluation increment and any remaining loss is charged earnings.

If an impairment loss subsequently reverses, the carrying amount of the asset is increased accordingly, but the increased carrying amount may not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. A reversal of an impairment loss is recognized in earnings, unless the asset is carried at a revalued amount, in which case the reversal of the impairment loss is first recognized as gains to the extent that an impairment loss on the same revalued asset was previously charged to earnings.

Stock-based Compensation

Employee stock options granted between January 1, 2004 and December 31, 2007 were accounted for under the interpretations issued by the Accounting Research and Development Foundation (“ARDF”). The Corporation adopted the intrinsic value method, under which compensation cost is recognized on a straight-line basis over the vesting period.

Pension Cost

Pension cost under a defined benefit plan is determined by actuarial valuations. Contributions made under a defined contribution plan are recognized as pension cost during the period in which employees render services.

Curtailment or settlement gains or losses of the defined benefit plan are recognized as part of the net periodic pension cost for the period.

Convertible Bonds

For convertible bonds issued on or after January 1, 2006, the Corporation first determines the carrying amount of the liability component by measuring the fair value of a similar liability that does not have an associated equity component, then determines the carrying amount of the equity component, representing the equity conversion option, by deducting the fair value of the liability component from the fair value of the convertible bonds as a whole. The liability component (excluding the embedded derivatives) is measured at amortized cost using the effective interest method, while the embedded non-equity derivatives are measured at fair value. Upon conversion, the Corporation uses the aggregate carrying amount of the liability and equity components of the bonds at the time of conversion as a basis to record the common shares issued.

Treasury Stock

Treasury stock is stated at cost and shown as a deduction to arrive at stockholders' equity.

Income Tax

The Corporation applies intra-period and inter-period allocations for its income tax, whereby (1) a portion of income tax expense is allocated to the cumulative effect of changes in accounting principles; and (2) deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused loss carryforward and unused tax credits. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred income tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

Tax credits for purchases of machinery, equipment and technology, research and development expenditures, and personnel training expenditures are recognized using the flow-through method.

Adjustments of prior years' tax liabilities are added to or deducted from the current period's tax provision.

According to the Income Tax Law, an additional tax at 10% of unappropriated earnings is provided for as income tax in the year the shareholders approve to retain the earnings.

Foreign Currencies

Non-derivative foreign-currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange differences arising from settlement of foreign-currency assets and liabilities are recognized in profit or loss.

At the balance sheet date, foreign-currency monetary assets and liabilities are revalued using prevailing exchange rates and the exchange differences are recognized in profit or loss.

If the functional currency of an equity-method investee is a foreign currency, translation adjustments will result from the translation of the investee's financial statements into the reporting currency of the Corporation. Such adjustments are accumulated and reported as a separate component of shareholders' equity.

Reclassifications

Certain accounts in the financial statements as of and for the six months ended June 30, 2009 have been reclassified to conform to the presentation of the financial statements as of and for the six months ended June 30, 2010.

3. EFFECTS OF CHANGES IN ACCOUNTING PRINCIPLES

Accounting for Inventories

On January 1, 2009, the Corporation adopted the newly revised SFAS No. 10, "Accounting for Inventories". The main revisions are (1) inventories are stated at the lower of cost or net realizable value, and inventories are written down to net realizable value item-by-item except when the grouping of similar or related items is appropriate; (2) unallocated overheads are recognized as expenses in the period in which they are incurred; and (3) abnormal costs, write-downs of inventories and any reversal of write-downs are recorded as cost of goods sold for the period. The adoption did not result in net income for the six months ended June 30, 2009.

17. PENSION PLANS

The pension plan under the Labor Pension Act (the "LPA") is a defined contribution plan. Based on the LPA, the Corporation makes monthly contributions to employees' individual pension accounts at not less than 6% of monthly salaries and wages. Such pension costs were $10,329 thousand and $8,790 thousand for the six months ended June 30, 2010 and 2009, respectively.

Based on the defined benefit plan under the LSL, pension benefits are calculated on the basis of the length of service and average monthly salaries of the six months before retirement. The Corporation contributes amounts equal to 2% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. The pension fund is deposited in the Bank of Taiwan in the committee's name. The Corporation recognized pension costs of $1,993 thousand and $1,716 thousand for the six months ended June 30, 2010 and 2009, respectively.

18. STOCKHOLDERS' EQUITY

Capital Stock

The Corporation's authorized capital is $4,000,000 thousand and $3,500,000 thousand at June 30, 2010 and 2009 ($10.00 par value per share, respectively). As of June 30, 2010 and 2009, the Corporation's issued capital stock were $2,909,070 thousand and $2,716,981 thousand, respectively, divided into 290,907 thousand and 271,698 thousand shares, respectively, at NT$10.00 par value each.

Employee Stock Options

In December 2007, 8,000, options, were granted to qualified employees of the Corporation and its subsidiaries. Each option entitles the holder to subscribe for one thousand common shares of the Corporation when exercisable. The options granted are valid for 5 years and exercisable at certain percentages after the second anniversary year from the grant date. The options were granted at an exercise price equal to the closing price of the Corporation's common shares listed on the TSE on the grant date. For any subsequent changes in the Corporation's paid-in capital, the exercise price is a adjusted accordingly.

Information about employee stock option plans was as follows:

	Six Months Ended June 30

Capital Surplus

Under the Company Law capital surplus can only be used to offset a deficit. However, the capital surplus from share issued in excess of par (additional paid-in capital from issuance of common shares, conversion of bonds and treasury stock transactions) and donations may be capitalized, which however is limited to a certain percentage of the Corporation's paid-in capital. Also the capital surplus from long-term investments may not be used for any purpose.

Capital surplus comprised of the following:

	June 30	
	2010	2009
Arising from issuance of common shares	$ 332,289	$ 329,152
Arising from conversion of bonds	776,646	736,879

Appropriation of Earnings and Dividend Policy

Under and the Corporation's Articles of Incorporation, the Corporation should make appropriation from its net income less any prior years' deficit, 10% should be appropriated as legal reserve. The remaining amount may be fully or partially retained and partially distributed for dividends, with the stockholders' approval, according to the following percentages.

a. Employee bonus - not less than 3%;

b. Directors and supervisors' remuneration - not more than 2%; and

c. Stock bonuses to employees include subsidiary employees who meet certain criteria set by the board of stockholders.

Dividends are recommended by the board of directors in accordance with the Corporation's dividend policy. Under this policy, industry trend and growth should be evaluated, investment opportunities should be fully understood, and proper capital adequacy ratios should be considered in determining the dividend to be distributed. In addition, cash dividends should not be less than 20% of the total dividends to be appropriated.

For the six months ended June 30, 2010 and 2009, the bonus to employees was $73,921 thousand and $21,507 thousand, respectively, the remuneration to directors and supervisors was $9,856 thousand and $2,151 thousand, respectively. The bonus to employees and remuneration to directors and supervisors represented 10% and 15%; 2% and 1%, respectively, of net income (net of the bonus and remuneration). Material differences between such estimated amounts and the amounts proposed by the Board of Directors in the following year are adjusted for in the current year. If the actual amounts subsequently resolved by the stockholders differ from the proposed amounts, the differences are recorded in the year of stockholders' resolution as a change in accounting estimate. If a share bonus is resolved to be distributed to employees, the number of shares is determined by dividing the amount of the share bonus by the closing price (after considering the effect of cash and stock dividends) of the shares of the day immediately preceding the shareholders' meeting.

Based on a directive issued by the Securities and Futures Bureau, an amount equal to the net debit balance of certain stockholders' equity accounts (including unrealized gain or loss on financial instruments, cumulative transaction adjustments) shall be transferred from unappropriated earnings to a special reserve. Any special reserve appropriated may be reversed to the extent of the decrease in the net debit balance.

Legal reserve shall be appropriated until it has reached the Corporation's paid-in capital. This reserve may be used to offset a deficit. When legal reserve has reaches 50% of the Corporation's paid-in capital, up to 50% thereof may be transferred to pay in capital.

Except for non-ROC resident stockholders, all stockholders receiving the dividends are allowed a tax credit equals to their proportionate share of the income tax paid by the Corporation.

The appropriation of earnings for 2009 and 2008 had been approved in the stockholders' meeting on June 15, 2010 and June 13, 2009, respectively. The appropriations and dividends per share were as follows:

	Appropriation of Earnings		Dividends Per Share (NT$)	
	For Year 2009	For Year 2008	For Year 2009	For Year 2008
Legal reserve	$ 78,222	$ 95,182	$ -	$ -
Cash dividends	575,814	537,396	2.0	2.0
Stock dividends	57,581	134,349	0.3	0.5

The bonus to employees and the remuneration to directors and supervisors for 2009 and 2008 approved in the stockholders' meetings on June 15, 2010 and June 13, 2009, respectively, were as follows:

	Year Ended December 31, 2009		Year Ended December 31, 2008	
	Cash	Stock	Cash	Stock
Bonus to employees	$ 71,168	$ -	$ 60,699	$ 60,699
Remuneration to directors and supervisors	7,117	-	16,187	-

The number of shares of 2,180 thousand was determined by dividing the amount of share bonus by the closing price (after considering the effect of cash and stock dividends) of the day immediately preceding the stockholders' meeting.

	Year Ended December 31, 2009		Year Ended December 31, 2008	
	Bonus to Employee Bonus	Remuneration to Directors and Supervisors	Bonus to Employee Bonus	Remuneration to Directors and Supervisors
Amounts approved in stockholders' meetings	$ 71,168	$ 7,117	$ 121,398	$ 16,187
Amounts recongnized in respective financial statements	70,334	7,033	122,755	16,368
	$ 834	$ 84	$ (1,357)	$ (181)

The differences between the approved amounts of the bonus to employees and the remuneration to directors and supervisors and the accrual amounts reflected in the financial statements for the years ended December 31, 2009 and 2008 were primarily due to changes in estimates had been adjusted in profit and loss for the six months ended June 30, 2010 and 2009, respectively.

Information on the bonus to employees, directors and supervisors is available on the Market Observation Post System website of the Taiwan Stock Exchange.

For the six months ended June 30, 2010 and 2009, the Legislative Yuan passed the following amendments to tax laws:

a. In May 2009, the Legislative Yuan passed the amendment of Article 5 of the Income Tax Law, which reduces a profit-seeking enterprise's income tax rate from 25% to 20% and revised the income tax rate from 20% to 17% in May 2010, effective January 1, 2010.

b. Under Article 10 of the Statute for Industrial Innovation (SII) passed by the Legislative Yuan on April 16, 2010, a profit-seeking enterprise may deduct up to 15% of its research and development expenditures from its income tax payable for the fiscal year in which these expenditures are incurred, but this deduction should not exceed 30% of the income tax payable for that fiscal year. This incentive took effect from January 1, 2010 and effective till December 31, 2019.

The ARDF issued Interpretation 2007-052 that requires companies to recognize bonuses paid to employees, directors and supervisors as compensation expenses beginning January 1, 2008. These bonuses were previously recorded as appropriations from earnings.

If the Corporation may settle the bonus to employees by cash or shares, the Corporation should presumes that the entire amount of the bonus will be settled in shares and the resulting potential shares should be included in the weighted average number of shares outstanding used in the calculation of diluted EPS, if the shares have a dilutive effect. The number of shares is estimated by dividing the entire amount of the bonus by the closing price of the shares of the balance sheet date. Such dilutive effect of the potential shares should be included in the calculation of diluted EPS until the stockholders resolve the number of shares to be distributed to employees at their meeting in the following year.

The weighted average number of shares outstanding for EPS calculation has been retroactively adjusted for the issuance of employee stock bonuses distributed out of earnings for the six month ended June 30, 2009 and stock dividends. This adjustment caused the basic and diluted after income tax EPS for the six months ended June 30, 2009 to decrease from $0.89 to $0.84.

23. FINANCIAL INSTRUMENTS

Fair values of financial instruments:

	June 30			
	2010		2009	
	Carrying Amount	**Fair Value**	**Carrying Amount**	**Fair Value**
Financial assets				
Financial assets at FVTPL- current	$ -	$ -	$ 9,988	$ 9,988

Long-term debt (including current portion)	681,062	681,062	809,273	809,273

Methods and assumptions used in the determination of fair values of financial instruments were as follows:

a. The above financial instruments do not include cash and cash equivalents, notes and accounts receivables, payables and short-term loans. Because of the short maturities of these instruments, the carrying values represent a reasonable basis to estimate fair values.

b. Fair values of financial instruments designated as at FVTPL, available-for-sale and derivatives are based on their quoted prices in an active market. For those instruments with no quoted market prices, their fair values are determined using valuation techniques incorporating estimates and assumptions consistent with those generally used by other market participants to price financial instruments.

c. Financial assets carried at cost are investments in unquoted shares, which have no quoted prices in an active market and entail an unreasonably high cost to obtain verifiable fair values. Therefore, no fair value is presented.

d. Fair value of long-term loans and bonds payable are estimated using the present value of future cash flows discounted by the interest rates.

Fair value of financial assets and liabilities based on quoted market prices or valuation techniques were as follows:

	Quoted Market Price		**Valuation Techniques**	
	June 30		**June 30**	
	2010	**2009**	**2010**	**2009**
Assets				
Available-for-sale financial assets, current	$ 760,554	$ 120,329	$ -	$ -

Long-term debt (including current portion)	-	-	681,062	809,273
Financial liabilities at FVTPL	-	-	4,708	-

Valuation gains and losses arising from changes in fair value of financial instruments determined using valuation techniques were $11,380 thousand and $6,168 thousand for the six months ended June 30, 2010 and 2009, respectively.

Information about financial risks was as follows:

a. Market risk: The Corporation's market risk refers to the uncertainties due to exchange rate fluctuations. Gains or losses on forward exchange contracts are likely to offset the gains or losses on foreign-currency assets or liabilities. The Corporation does not have significant price risk.

b. Credit risk: Credit risk represents the potential loss that would be incurred by the Corporation if the counter-parties breached the contracts. The counter-parties to the foregoing financial instruments are reputable financial institutions and business organizations. Management does not expect the Corporation's exposure to default by those parties be material

c. Liquidity risk: The Corporation's operating funds are deemed sufficient to meet the cash flow demand, therefore liquidity risk is not considered to be significant.

d. Cash flow interest rate risk: The Corporation's short-term and long-term loans are floating-rate. When the market interest rate increases by one percentage point, the Corporation's cash outflow will increase by $10,200 thousand a year.
